Problem Description

Challenges :

- Failing to manage time wisely and losing focus due to various distractions are some of the major challenges faced while studying/working remote.
- Forgetting deadlines and falling out of the time table is very common in an online set up.
- Lack of motivation to complete the course tasks.

Humans lose focus on a single task after 5-20 minutes

20 seconds of break is essential for every 20 minutes of screen time.

Multitasking reduces productivity by up to 40%

It takes up to 23 minutes to regain focus after being distracted

Objective

To develop an application by extending the features of existing online learning platforms for the enhancement of student learning experience by tracking the student's activity on the platform.

Features of our product :

LIMITED DISTRACTIONS

Providing fun alerts and notifications to prevent the user from getting distracted.

TIME MANAGEMENT

Time spent on each module is tracked to improve the user's conscience on time.

TIMELY REMINDERS

Assignment and task deadlines are frequently reminded.

TAKE BREAKS

Alerting the user to go offline regularly to help them recharge, reset and minimize fatigue.

FIND BALANCE

Make time for other activities that nourish your mind and soul.

INSPIRE ONE ANOTHER

Providing constant encouragement to help the user to stay motivated.

Features

WATCH TOGETHER

Providing synced video streaming + video call + chat to enhance peer-peer learning.

FLASH CARDS

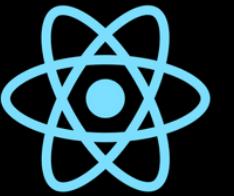

Important points in each lecture are made into flashcards so that students can refer in one glance at a later point in future.

LO-FI BEATS

Students can use this feature to listen to Lo Fi music while reading which can help them focus on lessons.

STUDY WITH ME

Studying along with friends, live, for motivation and support and improve productivity. This induces others to study and remain focused as well
